Gotcha. Do we have a rough idea when the HQ GKM money will show up?

Will - The text in yellow makes me think that HQ is looking nationally at available funding that could be realigned/reallocated to cover the costs of the GKM spill. I just want to make sure our funds are not reallocated to the national pot.

“Sam,

We talked with Jennifer Wilbur this morning to iron out some of the details we had been discussing with you Friday. A point she brought up was the amount of C6 funding we had in the region. As of this morning we have \$569K in intramural and \$3.023M in extramural funds that is available. We know that SF may have some response/removal work outside of Gold King Mine to accomplish this fiscal year. With that said, we may want to see how much of the \$3.594M we do not want to execute as OSWER looks to realign resources to fund this response. Collectively they have identified approximately \$60M available across all RPIOs that could be tapped if necessary.

We plan to share this information with our R8 and R9 counterparts so they can share with their management as well. Please let us know if you have any questions.”

HQ wouldn't try to sweep anything until the new fiscal year, and then only FY14 money. The

money listed below is FY15, and it will all definitely be on one contract or the other in the first half of September. Really, we just want to make sure we aren't adding it to one contract and then end up needing it elsewhere. Once we receive the HQ money for GKM, this will no longer be an issue.

My concern is that HQ may be sweeping all funds we don't identify as necessary.

Hi,

Will and I were discussing adding \$1.2 M now to Weston TO 1 which will be available for Camp Minden as needed – but could also be used to respond to other emergencies that could arise if needed. Will added \$1.1 M last week to the TO and immediately put it on the Gold King TDD, so it is currently funded and waiting for the planned HQ \$.

I would like to keep a certain amount of 6A00E \$ available to respond to new emergencies through the end of the FY. What is not needed for new ERs could then be added to the START contract, as needed .

OK?
